

WARREN COUNTY ECONOMIC SCORECARD

Q1 2022

†YTD Performance as of March 31, 2022

Performance Overview						
YTD	+		-		=	
Quarter (Q1 2022)	Current	Previous	Current	Previous	Current	Previous
Economic (5)	4	5	1	0	0	0
Consumer (5)	3	3	2	2	0	0
Total (10)	7	8	3	2	0	0

Q1 2022 Highlights: Warren County's economic recovery continued in the first quarter of 2022, registering seven positive-trending indicators, compared to eighth the preceding quarter. Workforce development trends in the county were especially positive, with its ranks of unemployment insurance beneficiaries falling below pre-COVID levels. The labor force expanded throughout Q1 after contracting the previous quarter. Private sector employment in the Glens Falls metro area also increased by an average 6.8 percent. Labor force improvements may have contributed to a decline in the average weekly hours worked by private sector employees, but that number was below the five-year, pre-COVID average.

While sales tax collections did increase in Q1 by 18.8 percent, part of that was driven by inflation. Closed single-family home sales were down 28 percent and new listings declined by 15.4 percent.
